MATIAS NIEMINEN

I'm a 23-year-old computer science student from the University of Helsinki, currently in my second year of studies. As of now, I am concentrating on full stack development, but my studies will branch out to leadership and business management as well.

My current programming repertoire includes languages such as Java, C#, Javascript (Node.js, React.js, Express, MongoDB), SQL, and Python. I enjoy learning new languages and indulging in software projects in my free time, which gives me an edge in swift improvement.
